Profile

Full-Stack Software Engineer with nearly 3 years of experience shipping production web and mobile applications with React, Next.js, Node.js and TypeScript. Delivered features across 10+ client applications in e-commerce, CRM and SaaS. Works across the stack: role-based auth, PostgreSQL and MongoDB, payments, AI chatbots and automated testing.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3, SCSS
Frontend: React, Next.js, React Native (Expo), Vue.js, Nuxt.js, Redux Toolkit, Zustand, Tailwind CSS
Backend & Data: Node.js, Express.js, REST APIs, PostgreSQL, MongoDB, Supabase (Auth, RLS), Firebase, JWT
Integrations & AI: Stripe, PayPal, RevenueCat, Shopify API, LLM API integration, RAG-based chatbots
Testing & DevOps: Playwright, Vitest, GitHub Actions (CI/CD), Docker, Vercel, Git, Figma
3D & Animation: Three.js, Konva.js, GSAP, Framer Motion

Experience

Full-Stack Developer Apr 2026 – Present
Self-employed (Freelance) *Islamabad, Pakistan / Remote*

- Built **Engrave Me Now**, a production ordering platform for a laser-engraving business, with Next.js, TypeScript and Supabase.
- Designed the authentication and authorization model: Supabase Auth with role-based routing for customer, wholesale and staff areas, enforced by **PostgreSQL row-level security**.
- Integrated **Stripe and PayPal** payments, Google Places address lookup, transactional email and an **AI chatbot** for customers.

Full-Stack Engineer Jun 2024 – Mar 2026
IKONIC Solutions *Islamabad, Pakistan*

- Delivered features across **10+ production applications** in e-commerce, CRM and SaaS for international clients using React, Next.js, Vue.js, Nuxt.js and Node.js.
- Built a **real-time 2D/3D product customizer** for Stache Cups with Nuxt.js, Three.js and Konva.js, driven by Shopify product and variant data; worked with design, backend and QA teams.
- Integrated REST APIs and PostgreSQL/Supabase services with authentication and data workflows, including loading, error and empty states.
- Improved rendering performance and technical SEO through SSR/SSG, lazy loading and image optimization.

Frontend Developer (Contract) Apr 2024 – May 2024
Code Nativex *Remote*

- Delivered React-based frontend work for agency client projects sourced through Fiverr, working with the agency team on client requirements and revisions.

Software Engineer Dec 2023 – Mar 2024
Joyn Group *Islamabad, Pakistan*

- Built responsive, pixel-accurate React screens from Figma with Tailwind CSS, Redux Toolkit and REST APIs; contributed to authentication flows and feature delivery with design and backend teams.

Projects

Well Mode | *React Native, Expo, TypeScript, Firebase, RevenueCat* Live on Google Play

- Cross-platform wellness app with Firebase Authentication, Firestore sync, RevenueCat subscriptions, local notifications and persisted state, covered by **224+ automated tests**.

ZUBZEN Store | *React, Node.js, Express, MongoDB* Live

- MERN e-commerce store: Express REST API for products, filtering and orders, customer authentication, cart and order placement.

LineSkip CRM Dashboard | *React 18, React Router 6, Axios, Tailwind CSS*

- Restaurant CRM dashboard for customers, campaigns, loyalty, messaging and reporting.

Education

University of Buner Buner, Pakistan
Bachelor of Science in Computer Science *2022 – 2026*
